Birdie Num Num

CLUB EDITION

Live scoring, real handicaps, and every game your group loves — in one free app you add to your phone.

Every format you play

Stableford, stroke play, skins, singles, four-ball, Trifecta, Alternate Shot and Scramble - scored hole by hole.

Your own Ryder Cup

Create teams and scheduled sessions. Follow match points, standings and the overall result across your event.

Live, shared scoring

One keeper enters the group and standings update in real time. Share a live link and anyone can follow the round from the clubhouse.

Handicaps that keep themselves

Track a WHS-style index, with automatic course handicaps and net scoring. Or enter your own handicap index.

Know your game

A personal dashboard: index and scoring trends, par-3/4/5 averages, fairways, greens, putts, scrambling and sand saves.

Round recaps to share

Review the leaderboard, standout holes and recorded stats. Share a recap image with your group.

Every course, one library

Save courses and tees in your club library. Corrections apply to your club first, with admin review before other clubs see them.

Split costs, settle up

Track who paid and who owes, split evenly or custom, see every balance at a glance, and send a friendly nudge — no math at the bar.

Your club, organised

Invite members, manage players and handicaps, and use club-admin tools to organise your group.

Built for the course

Save scores on your phone when the signal drops, then sync when connected. Phone alerts keep your group in the loop.
